

HU LONG TEMPLE

SCHOOL OF CHINESE MARTIAL ARTS & WELLBEING

REGISTERED UNDER THE BRITISH COUNCIL FOR CHINESE MARTIAL ARTS (BCCMA) AND THE NSPCC: CPSU

DATA PROTECTION POLICY

Our Policy

Hu Long Temple is committed to complying with data protection law and to respecting the privacy rights of individuals. The policy applies to all of our staff, directors, trustees, volunteers and consultants (aka “Workers”).

This Data Protection Policy sets out our approach to data protection law and the principles that we will apply to our processing of personal data. The time of this Policy is to ensure that we process personal data in accordance with the law and with the utmost care and respect.

This Policy applies to our charitable company. References in this Policy to “us”, “we” and “our” are to Hu Long Temple School of Chinese Martial Arts and Wellbeing. References to “you”, “yourself” and “you” are to each Worker to whom this Policy applies.

We recognise that you have an important role to play in achieving these aims. It is your responsibility, therefore, to familiarise yourself with this Policy and to apply and implement its requirements when processing any personal data.

Please pay special attention to sections 14, 15 and 16 as these set out the practical day to day actions that you must adhere to when working or volunteering for the charitable company.

Data protection law is a complex area. This Policy has been designed to ensure that you are aware of the legal requirements imposed on you and us and to give you practical guidance on how to comply with them. This Policy also sets out the consequences of failing to comply with these legal requirements. However, this Policy is not an exhaustive statement of data protection nor of our or your responsibilities in relation to data protection.

If at any time you have any queries on this Policy, your responsibilities or any aspect of data protection law, seek advice. Contact Matt Bindon, who is the Founding Director and the individual who has been appointed to be responsible for its data protection compliance.

1. Who is responsible for data protection?

1. All our Workers are responsible for data protection, and each person has their role to play to make sure that we are compliant with data protection laws.
2. We are not required to appoint a Data Protection Officer, however, we have still appointed Matt Bindon (the Founding Director) to be responsible for overseeing our compliance with data protection laws.

2. Why do we have a data protection policy?

1. We recognise that processing of individuals’ personal data in a careful and respectful manner cultivates trusting relationships with those individuals and trust in our brand. We believe that such relationships will enable the charitable company to work more effectively with and to provide a

better service to those individuals.

2. This Policy works in conjunction with other policies implemented by us from time to time, including for example the Data Breach Policy, Safeguarding Policy and any other policies we implement from time to time.

3. Status of this Policy and the implications of breach.

1. Any breaches of this Policy will be viewed very seriously. All Workers must read this Policy carefully and make sure they are familiar with it. Breaching this Policy is a disciplinary offence and will be dealt with under our Disciplinary Procedure.
2. If you do not comply with Data Protection Laws and/or this Policy, then you are encouraged to report this fact immediately to the Founding Director. This self-reporting will be taken into account in assessing how to deal with any breach, including any non-compliance which may pre-date this Policy coming into force.
3. Also if you are aware of or believe that any other representatives of ours is not complying with Data Protection Laws and/or this Policy you should report it in confidence to the Founding Director. Our Whistleblowing Policy will apply in these circumstances and you may choose to report any non-compliance or breach through our confidential whistleblowing reporting facility.

4. Other Consequences

1. There are a number of serious consequences for both yourself and us if we do not comply with Data Protection Laws. These include:

- 1.1. For you:

- 1.1.1. **Disciplinary action:**

If you are an employee, your terms and conditions of employment require you to comply with our policies. Failure to do so could lead to disciplinary action including dismissal.

Where you are a volunteer or member, failure to comply with our policies could lead to termination of your position or membership with us.

- 1.1.2. **Criminal sanctions:**

Serious breaches could potentially result in criminal liability.

- 1.1.3. **Investigations and interviews:**

Your actions could be investigated and you could be interviewed in relation to any non-compliance.

- 1.2. For Hu Long Temple School of Chinese Martial Arts and Wellbeing:

- 1.2.1. **Criminal sanctions:**

Non-compliance could involve a criminal offence.

- 1.2.2. **Civil Fines:**

These could be up to €20 million or 4% of group worldwide turnover, whichever is higher.

- 1.2.3. **Assessments, investigations and enforcement action:**

We could be assessed or investigated by, and obliged to provide the information to, the Information Commissioner on its processes and procedures and/or subject to the Information Commissioner's powers of entry, inspection and seizure causing

disruption and embarrassment.

1.2.4. **Court orders:**

These may require us to implement measures or take steps in relation to, or cease or refrain from, processing personal data.

1.2.5. **Claims for compensation:**

Individuals may make claims for damage they have suffered as a result of our non-compliance.

1.2.6. **Bad publicity:**

Assessments, investigations and enforcement action by, and complaints to, the Information Commissioner quickly become public knowledge and might damage our brand. Court proceedings are public knowledge.

1.2.7. **Loss of business:**

Prospective members, participants, customers, suppliers, volunteers, and contractors might not want to deal with us if we are viewed as careless with personal data and disregarding our legal obligations.

1.2.8. **Use of management time and resources:**

Dealing with assessments, investigations, enforcement action, complaints, claims, etc takes time and effort and can involve considerable cost.

5. Data Protection Laws

1. The Data Protection Act 1998 (“DPA”) applies to any personal data that we process, and from the 25th May 2018, this was replaced by the General Data Protection Regulation (GDPR) and the Data Protection Act 2018 (“DPA 2018”) (together “Data Protection Laws”) and then after Brexit the UK will adopt laws equivalent to these Data Protection Laws.
2. The Data Protection Laws all require that the personal data is processed in accordance with Data Protection Principles (on which see below) and gives individuals rights to access, correct and control how we use their personal data (on which see below).

6. Keywords in relation to data protection.

1. “Personal data” is data that **relates** to a living individual **who can be identified** from that data (or from that data and other information in or likely to come into our possession). That living individual might be an employee, member, prospective customer, customer, supplier, contractor or contact, and that personal data might be written, oral or visual (.e.g CCTV).
2. “Identifiable” means that the individual can be distinguished from a group of individuals (although the name of that individual need not be ascertainable). The data might identify an individual on its own (e.g. by a name or video footage) or if taken together with other information available or obtainable to us (e.g. a job title and company name).
3. “Data subject” is the living individual to whom the relevant personal data relates.
4. “Processing” is widely defined under Data Protection Law and generally any action taken by us in respect of personal data will fall under the definition, including for example, collection, modification, transfer, viewing, deleting, holding, backing up, archiving, retention, disclosure or destruction of personal data, including CCTV images.

5. "Data Controller" is the person who decides how personal data is used, for example, we will always be a data controller in respect of personal data relating to our employees / volunteers.
6. "Data Processor" is a person who processes personal data on behalf of a data controller and only processes that personal data in accordance with instructions from the data controller, for example, an outsourced payroll provider will be a data processor.

7. Personal Data.

1. Data will relate to an individual and therefore be their personal data if it:
 - 1.1. identifies the individual. For instance, names, address, telephone numbers and email addresses;
 - 1.2. its content is about the individual personally. For instance, medical records, credit history, a recording of their actions, or contact details;
 - 1.3. relates to property of the individual, for example their home, their car or other possessions;
 - 1.4. it could be processes to learn, record or decide something about the individual (or this is a consequence of processing). For instance, if you are able to link the data to the individual to tell you something about them, this will relate to the individual (e.g. salary details for a post where this is only one names individual in that post, or a telephone bill for the occupier of a property where there is only one occupant);
 - 1.5. is biographical in a significant sense, that is, it does more than record the individual's connection with or involvement in a matter or event which has no personal connotations for them. For instance, if an individual's name appears on a list of attendees of an organisation meeting this may not relate to the individual and may be more likely to relate to the company they represent;
 - 1.6. has the individual as its focus, that is, the information relates to the individual personally rather than to some other person or a transaction or event he/she was involved in. For instance, if a work meeting is to discuss the individual's performance this is likely to relate to the individual;
 - 1.7. affects the individual's privacy, whether in their personal, family, organisation or professional capacity, for instance, email address or location and work email addresses can also be personal data;
 - 1.8. is an expression of opinion about the individual; or
 - 1.9. is an indication of our (or any other person's) intentions towards the individual (e.g. how a complaint by that individual will be dealt with).
2. Information about companies or other legal persons who are not living individuals is not personal data. However, information about directors, shareholders, officers and employees, and about sole traders or partners, is often personal data, so business related information can often be personal data.
3. Examples of information likely to constitute personal data:
 1. Unique names;
 2. Names together with email addresses or other contact details;

3. Job title and employer (if there is only one person in the position);
4. Video and photographic images;
5. Information about individuals obtained as a result of Safeguarding checks;
6. Medical and disability information;
7. CCTV images;
8. Member profile information; and
9. Financial information and accounts (e.g. information about expenses and benefits entitlements, income and expenditure).

8. Lawful basis for processing.

1. For personal data to be processed lawfully, we must be processing it on one of the legal grounds set out in the Data Protection Laws.
2. For the processing of ordinary personal data in our charitable company, these may include, among other things:
 1. the data subject has given their consent to the processing (perhaps on their Health Declaration Form).
 2. the processing is necessary for the performance of a contract with the data subject (for example, for processing memberships);
 3. the processing is necessary for compliance with a legal obligation to which the data controller is subject (such as reporting employee PAYE deductions to tax authorities); or
 4. the processing is necessary for the legitimate interest reasons of the data controller or a third party (for example, keeping in touch with members, volunteers, participants about competitions, workshops, classes / sessions or events).

9. Special category data.

1. Special category data under the Data Protection Laws is personal data relating to an individual's race, political opinions, health, religious or other beliefs, trade union records, sex life, biometric data and genetic data.
2. Under Data Protection Laws this type of information is known as special category data and criminal records history becomes its own special category which is treated for some parts the same as special category data. Previously these types of personal data were referred to as sensitive personal data and some people may continue to use this term.
3. To lawfully process special categories of personal data we must also ensure that either the individual has given their explicit consent to the processing of that another of the following conditions has been met:
 1. the processing is necessary for the performance of our obligations under employment law;
 2. the processing is necessary to protect the vital interests of the data subject. The ICO has previously indicated that this condition is unlikely to be met other than in a life or

death or other extreme situation.

3. the processing relates to information manifestly made public by the data subject;
 4. the processing is necessary for the purpose of establishing, exercising or defending legal claims; or
 5. the processing is necessary for the purpose of preventative or occupational medicine or for the assessment of the working capacity of the employee.
4. To lawfully process personal data relating to criminal records and history there are even more limited reasons, and we must either:
1. ensure that either the individual has given their explicit consent to the processing; or
 2. ensure that our processing of those criminal records history is necessary under a legal requirement imposed upon us.
5. We would normally only expect to process special category personal data or criminal records history usually in a Human Resources context and also in the context of our members/athletes/coaches/volunteers etc. for monitoring performance, health and safety requirements, safeguarding checks, or competition applications/admittances, etc.
6. Virtually anything we do with personal data is processing including collection, modification, transfer, viewing, deleting, holding, backing up, archiving, retention, disclosure or destruction. So even just storage of personal data is a form of processing. We might process personal data using computers or manually by keeping paper records.
7. Examples of processing personal data might include:
1. Using personal data to correspond with members;
 2. Holding personal data in our databases or documents; and
 3. Recording personal data in personnel or member files.

10. Outline.

1. The main themes of the Data Protection Laws are:
 1. good practices for handling personal data;
 2. rights for individuals in respect of personal data that data controllers hold on them; and
 3. being able to demonstrate compliance with these laws.
2. In summary, data protection law requires each data controller to:
 1. only process personal data for certain purposes;
 2. process personal data in accordance with the 6 principles of 'good information handling' (including keeping personal data secure and processing it fairly and in a transparent manner);
 3. provide certain information to those individuals about whom we process personal data which is usually provided in a privacy notice, for example, you would have received one of

these from us as one of our “Workers”;

4. respect the rights of those individuals about whom we process personal data (including providing them with access to the personal data we hold on them); and
 5. keep adequate records of how data is processed and, where necessary, notify the ICO and possibly data subjects where there has been a data breach.
3. Every “Worker” has an important role to play in achieving these aims. It is your responsibility, therefore, to familiarise yourself with this Policy.
 4. Data protection law in the UK is enforced by the Information Commissioner’s Office (“ICO”). The ICO has extensive powers.

11. Data protection principles.

1. The Data Protection Laws set out 6 principles for maintaining and protecting personal data, which form the basis of the legislation. All personal data must be:
 1. processed lawfully, fairly and in a transparent manner and only if certain specified conditions are met;
 2. collected for specific, explicit and legitimate purposes, and not processed in any way incompatible with those purposes (“purpose limitation”);
 3. adequate and relevant, and limited to what is necessary to the purposes for which it is processed (“data minimisation”);
 4. accurate and where necessary kept up to date;
 5. kept for no longer than is necessary for the purpose (“storage limitation”);
 6. processed in a manner that ensures appropriate security of the personal data using appropriate technical and organisational measures (“integrity and security”).

12. Data subject rights.

1. Under Data Protection Laws individuals have certain rights in relation to their own personal data. In summary these are:
 1. The rights to access their personal data, usually referred to as a “subject access request”.
 2. The right to have their personal data rectified;
 3. The right to have their personal data erased, usually referred to as the “right to be forgotten”;
 4. The right to restrict processing of their personal data;
 5. The right to object to receiving direct marketing materials;
 6. The right to portability of their personal data;

7. The right to object to processing of their personal data; and
 8. The right to not be subject to a decision made solely by automated data processing.
2. The exercise of these Rights may be made in writing, including email, and also verbally and should be responded to in writing by us (if we are the relevant data controller) without undue delay and in any event within one month of receipt of the request. That period may be extended by two further months where necessary, taking into account the complexity and number of requests. We must inform the individual of any such extension within one month of receipt of the request, together with the reasons for the delay.
 3. Where the data subject makes the request by electronic form means, any information is to be provided by electronic means where possible, unless otherwise requested by the individual.
 4. If we receive the request from a third party (e.g. a legal advisor), we must take steps to verify that the request was, in fact instigated by the individual and that the third party is properly authorised to make the request. This will usually mean contacting the relevant individual directly to verify that the third party is properly authorised to make the request.
 5. There are very specific exemptions or partial exemptions for some of these Rights and not all of them are absolute rights. However, the right to not receive marketing material is an absolute right, so this should be complied with immediately.
 6. Where an individual considers that we have not complied with their request, e.g. exceeded the time period, they can seek a court order and compensation. If they court agrees with the individual, it will issue a Court Order, to make us comply. The Court can also award compensation. They can also complain to the regulator for privacy legislation, which in our case will usually be the ICO.
 7. In addition to the rights discussed in this document, any person may ask the ICO to assess whether it is likely that any processing of personal data has or is being carried out in compliance with the privacy legislation. The ICO must investigate and may serve an "Information Notice" on us (if we are the relevant data controller). The result of the investigation may lead to an "Enforcement Notice" being issued by the ICO. Any such assessments, information notices, or enforcement notices should be sent directly to the Founding Director from the ICO.
 8. In the event of a Worker receiving such a notice, they must immediately pass the communication to the Founding Director.

13. Notification and response procedure

1. If a Worker has a request or believes they have a request for the exercise of a Right, they should:
 1. pass the call to their supervisor/manager. The supervisor/manager should take and record all relevant details and explain the procedure. If possible try to get the request confirmed in writing addressed to the Founding Director; and
 2. inform the Founding Director of the request.
2. If a letter or fax exercising a Right is received by any Worker they should:
 1. pass the letter to their supervisor/manager;
 2. the supervisor/manager must log the receipt of the letter with the Founding Director and send a copy of it to them; and
 3. the Founding Director will then respond to the data subject on our behalf.

3. The Founding Director will co-ordinate our response which may include written material provided by external legal advisors. The action taken will depend upon the nature of the request. The Founding Director will write to the individual and explain the legal situation and whether we will comply with the request. A standard letter/email from the Founding Director should suffice in most cases.
4. The Founding Director will inform the relevant management line of any action that must be taken to legally comply. The Founding Director will co-ordinate any additional activity to meet the request.
5. The manager/senior manager who receives the request will be responsible for ensuring that the relevant response is made within the time period required.
6. The Founding Director's reply will be validated by the relevant manager of the department producing the response, For more complex cases, the letter/email to be sent will be checked by legal advisors.

14. Your main obligations.

1. What this all means for you can be summarised as follows:
 1. Treat all personal data with respect;
 2. Treat all personal data how you would want your own personal data to be treated;
 3. Immediately notify your line manager or the Founding Director if any individual says or does anything which gives the appearance of them wanting to invoke any rights in relation to personal data relating to them;
 4. Take care with all personal data and items containing personal data you handle or come across so that it stays secure and is only available to or accessed by authorised individuals; and
 5. Immediately notify the Founding Director if you become aware of or suspect the loss of any personal data or any item containing personal data. For more details on this see our separate Data Breach Policy which applies to all our Workers regardless of their position or role in our organisation.

15. Your activities.

1. Data protection laws have different implications in different areas of our charitable company and for different types of activity, and sometimes these effects can be unexpected.
2. Areas and activities particularly affected by data protection law include human resources, payroll, security (e.g. CCTV), customer care, sales, marketing and promotions, health and safety and finance.
3. You must consider what personal data you might handle, consider carefully what data protection law might mean for you and your activities, and ensure that you comply at all times with this policy.

16. Practical matters.

1. Whilst you should always apply a common sense approach to how you use and safeguard personal data, and treat personal data with care and respect, set out below are some examples of do's and don'ts:
 1. Do not take personal data out of the organisation's premises (unless absolutely necessary).
 2. Only disclose your unique logins and passwords for any of our IT systems to authorised personnel and not to anyone else.
 3. Never leave any items containing personal data unattended in a public place, e.g. on a train, in a cafe, etc, and this would include paper files, mobile phones, laptops, tablets, memory sticks, etc.
 4. Never leave any items containing personal data in insecure locations, e.g. in car on your drive overnight and this would include paper files, mobile phones, laptops, tablets, memory sticks etc.
 5. If you are staying at a hotel then utilise the room safe or the hotel staff to store items containing personal data when you do not need to have them with you.
 6. Do encrypt laptops, mobile devices and removable storage devices containing personal data.
 7. Do lock laptops, files, mobile devices and removable storage devices containing personal data away and out of sight when not in use.
 8. Do password protect documents and databases containing personal data.
 9. Never use removable storage media to store personal data unless the personal data on the media is encrypted.
 10. When picking up printing from any shared printer always check to make sure you only have the printed matter that you expect, and no third party's printing appears in the printing.
 11. Use confidential waste disposal for any papers containing personal data, do not place these into ordinary waste, place them in a bin or skip etc, and either use a confidential waste service or have them shredded before placing them in the ordinary waste disposal.
 12. Do dispose of any materials containing personal data securely, whether the materials are paper based or electronic.
 13. When in public place, e.g. a train or cafe, be careful as to who might be able to see the information on the screen of any device you are using when you have personal information on display. If necessary move location or change to a different task.
 14. Do ensure that your screen faces away from prying eyes if you are processing personal data, even if you are working in the office. Personal data should only be accessed and seen by those who need to see it.
 15. Do challenge unexpected visitors or employees accessing personal data.
 16. Do not leave personal data lying around, store it securely.

17. When speaking on the phone in a public place, take care not to use the full names of individuals or other identifying information, as you do not know who may overhear the conversation. Instead use initials or just first names to preserve confidentiality.
 18. If taking down details or instructions from an individual in a public place when third parties overhear, try to limit the information which may identify that person to others who may overhear in a similar way to if you were speaking on the telephone.
 19. Never act on instructions from someone unless you are absolutely sure of their identity and if you are unsure then take steps to determine their identity. This is particularly so where the instructions relate to information which may be sensitive or damaging if it got into the hands of a third party, or where the instructions involve money, valuable goods or items or cannot easily be reversed.
 20. Do not transfer personal data to any third part without prior written consent of your line manager or our Founding Director.
 21. Do notify your line manager or our Founding Director immediately of any suspected security breaches or loss of personal data.
 22. If any personal data is lost, or any devices or materials containing any personal data are lost, report it immediately to our Founding Director. For more details on this see our separate Data Breach Policy which applies to all our Workers regardless of their position or role in our charitable company.
2. However, you should always take a common sense approach, and if you see any areas of risk that you think are not addressed then please bring it to the attention of our Founding Director.

17. Foreign transfer of personal data.

1. Personal data must not be transferred outside the European Economic Area (EEA) unless the destination country ensures an adequate level of protection for the rights of the data subject in relation to the processing of personal data or we put in place adequate protections. This is mainly relevant to data held and accessed in Cloud-based services as well as some data processing the charitable company may outsource like payroll processing or performance data analysis.
2. These protections may come from special contracts we need to put in place with the recipient of the personal data, from them agreeing to be bound by specific data protection rules or due to the fact that the recipients own country's laws provide sufficient protection.
3. These restrictions also apply to transfers of personal data outside the EEA even if the personal data is not being transferred outside of our group of companies.
4. You must not under any circumstances transfer any personal data outside of the EEA without your line manager's or the Founding Director's prior written consent.
5. We will also need to inform data subjects of any transfer of their personal data outside of the UK and may need to amend their privacy notice to take account of the transfer of data outside of the EEA.
6. If you are involved in any new processing of personal data which may involve transfer of personal data outside of the EEA, then please seek approval of your line manager or our Founding Director prior to implementing any processing of personal data which may have this effect.

18. Queries.

1. If you have any queries about this Policy please contact either your line manager or the Founding Director.
